

Where is what?

- Package **de.fu.scetris.web.mods**
Java Classes containing business logic
- Package **de.fu.scetris.data.aspects**
Aspects containing special database logic
Accompanying pl/pgSQL is in **trunk/bakery/templates/sql-procedures.xml**.
- **trunk/web/xsl**
contains the XSL-Templates. Templates should be organized by module, each having it's own folder.
Have a look at **web/xsl/admin** on how to lay out a standard setup
- **trunk/web/xsl/i18n**
Language Strings. Please create files per module, per language.
See the folder for examples.

Modules (and Actions)

- Interface **de.fu.weave.Module**
- Common Implementation **de.fu.weave.impl.frigg.FriggModule**
- Annotations
 - @Arg
 - @Action

sample

```
// todo
```

Forms

- Interface **de.fu.weave.Form**
- Common implementation **de.fu.scetris.data.formsupport.AbstractForm**
- Annotations
 - General: @Field, @Required, @Multiple
 - Constraints: @Min, @Max, @Match, @Only, @Step
 - Validators: @ValidatorClass?, @ActiveValidator?
 - Converters: @ConverterClass?, @ActiveConverter?
 see also: **de.fu.junction.converter**

sample

```
// todo
```
